

REMARKS

In response to the Office Action, mailed on August 5, 2009, a complete listing of all of the claims is presented herewith. Applicant would like to elect Invention I, claims 20-26, drawn to a circuit subcombination, classified in class 349, subclass 33 (i.e. means for the electrical excitation of liquid crystal elements) for further prosecution. Applicant would like to withdraw Invention II, claims 27-32, drawn to a display apparatus combination, classified in class 345, subclass 53 (i.e. liquid crystal displays including signal waveform generators) from consideration.

Since the response to this restriction requirement includes an identification of the Invention elected consonant with the requirement under 35 U.S.C. Section 121 and a listing of all claims readable thereon, the response should be considered responsive and in condition for further prosecution.

Applicants also reserve the right to reintroduce the non-elected subject matter later and/or to pursue the non-elected subject matter by means of one or more divisional applications.

CONCLUSION

If the Examiner believes that a telephone conference would expedite the examination of the above-identified patent application, the Examiner is invited to call the undersigned.

Respectfully submitted,

Date :

Sept. 4, 2009
